

Give the gift of Creativity

Make your own PHOTO ON WOOD

Merry Christmas! Time to get creative. Here's a cool little gift that'll be fun to put together. Follow the steps and you'll have something extra special in no time.

Supplies:

A camera

A pack of A4 sticky label sheets

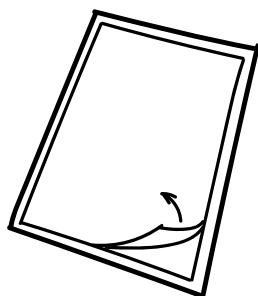

A small piece of wood

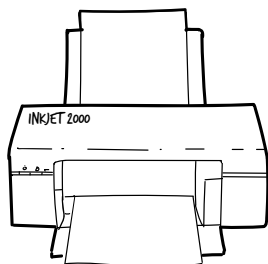

Fixative Spray

What to do:

Remember to reverse your image before printing.

1. Peel off the label and discard, but keep the backing paper – this is what you'll be printing on.

2. Place the backing paper into the printer, making sure to print on the side the label was on.

3. Choose a small, light block of wood. Carefully place the print on the wood and rub it down, gently, but firmly.

4. Seal with fixative spray.
