## Instant Payment System

Now your business can take on-the-spot credit card payments, using your mobile phone and boost your business prowess and financial prosperity. Being an Australian owned company Mint Wireless, the brains behind MiniMint, understands the unique requirements of Aussie businesses and have designed a payment system enabling companies to process payments wherever they might be....for a mobile, faster, slicker business.

Making the right choices regarding payment methods is a vital decision for the success of your business and with MiniMint the rewards are far reaching. Not only are you paid instantly, boosting cash flow and cutting bad debt, but you can finally get rid of the annoying paperwork by sending receipts in one click using SMS or email. Tax time has also just become a whole lot simpler using MiniMint, which records and reports all transaction types and payment types.

MiniMint works using smartphones including BlackBerry, Nokia and most Windows Mobiles 5.0 or 6.0 PDAs. (MiniMint will not work with iPhones at this stage)

### Features of MiniMint:

#### MiniMint includes software for a Smartphone:

- Record and process all credit card, Visa and MasterCard debit card, cash, and cheque payments.
- Generate receipts and email or SMS them to your customer.
- Includes training video to get you started.
- Includes software upgrades for 12 months.
- Includes technical support for 12 months.

#### Your own online reporting website:

- Records every transaction for future reference.
- Log in and track sales as they happen.
- Export reports into a spreadsheet for accounting purposes.
- Monitor field staff progress.
- Provides unprecedented insight into sales transactions.
- A business can have one user or hundreds of users reporting to the same back end system.

#### What are the costs?

- MiniMint is a subscription based product with an annual renewal subscription fee of \$199 and \$0.99 for every credit card transaction
- Included in the initial pricing is a 12 month subscription as well as 20 bonus transactions
- MiniMint works with your standard bank's credit card merchant account, if you don't have one Mint will help you set one up. Standard merchant fees will apply.
- The MiniMint system gives you the option of setting a transaction fee to recover these costs from your customers.

### Benefits of MiniMint:

- With the large number of Australian businesses becoming more mobile including plumbers, financial advisors and personal trainers - MiniMint is the perfect solution for businesses to be paid instantly using a mobile phone, boosting cash flow and reducing debt!
- Get rid of the security risks of carrying around cash - use your mobile phone with MiniMint software instead!
- MiniMint will put you on the right track to improving both business efficiency and productivity by providing an effective and trouble free payment method.
- You can now halve administration overheads and get rid of time consuming paperwork by sending receipts via email or SMS on the spot.
- Peace of mind is assured for both you and your customers with MiniMint being certified under the payment industry standard, used by the major banks (3DES).

### System Requirements:

PC running Windows® Vista®/XP Home or Pro; 1GHz Processor; 256MB RAM; Internet connection required if you wish to access the back end reporting system; Please visit [www.mini-wireless.com/miniminthandsets](http://www.mini-wireless.com/miniminthandsets) for the latest detailed list of compatible handsets.
