

Every kind of chair for every kind of workspace.

Officeworks has a huge range of quality chairs to help you work more comfortably, no matter where you work.

officeworks
— — — — —
make bigger things happen

Are you sitting comfortably?

You'll feel better and achieve more when you're sitting in a chair that's been specifically designed for the way we work today, whether it's for the office or the home. That's where we can help.

Set up your ergonomic workspace.

Our ergonomic seating, adjustable workstations, desks and foot supports create the healthiest possible set-up for a productive and safe work environment. Our business furniture range is designed to optimise each person's specific workspace.

Contact officefitout@officeworks.com.au to find out how to properly set up an ergonomic workspace.

Here are a few tips for setting up your ergonomic workspace.

Head

Directly over shoulder, without straining forward or backward, about an arm's length from screen.

Neck

Elongated and relaxed.

Shoulders

Kept down, with the chest open and wide.

Back

Upright or inclined slightly forward from the hips. Maintain the slight natural curve of the lower back.

Elbows

Relaxed, at about a right angle.

Knees

Relaxed and in a neutral position without flexing up or down.

Chair

Sloped slightly forward to facilitate proper knee position.

Feet

Firmly planted on the floor. Shorter people may need a footrest.

Screen

At eye level or slightly lower.

Wrists

Relaxed and in a neutral position without flexing up or down.

Fingers

Gently curved.

Keyboard

Best when kept flat (for proper wrist positioning) and at or just below elbow level.

We make it easy to find the chair that feels just right for you.

Take the guesswork out of chair shopping with our buyer's guide. [Click here for video.](#)

Chair fabric options.

Choose from 3 options. Upholstery fabric is durable and comfortable. Mesh fabric improves airflow. PU leather is spill resistant and easy to clean.

Features.

Seat comfort level.

Standard comfort seats have cut foam. Medium comfort seats have thicker and denser cut foam. High comfort seats have moulded foam that's more durable and supportive over time.

Recommended sitting time.

Some chairs are designed for all-day comfort, while others might be for more short-term use.

Weight capacity.

Finding a chair with a suitable weight limit will ensure the chair remains comfortable and durable.

Back rest tilt.

An adjustable back rest lets you change how you sit to reduce the pressure on your spine.

Back rest height.

Adjust the back rest height to suit the shape and length of your back.

Seat tilt.

Adjusting the seat tilt helps you correct your posture by giving you a more supportive seating position. It can help to reduce pressure on your back muscles and spine, reducing strain and preventing future aches and pains.

Adjustable armrests.

Supporting your arms and shoulders can be just as important as supporting your spine to avoid shoulder tension. Some armrests have multiple adjustments in addition to height adjustment.

Adjustable seat depth.

Allows you to adjust the position backwards and forwards so it rests comfortably behind the knee.

Chair tilt.

Keeps the backrest and seat at the same angle when you tilt backwards in the chair.

Synchronised mechanism.

Synchro chairs have a tilt mechanism that moves the back rest and seat together for optimum support.

Is it AFRDI?

The AFRDI certification system ensures that your chair meets a high level of safety, durability and ergonomics. These chairs have been certified for frequent and rigorous use.

AFRDI Green.

The AFRDI Green Tick certifies that the chair has been manufactured sustainably. This involves assessment of several factors including material sourcing, waste generated during production and recyclability at end of life.

FSC certification.

Certifies that the chair uses timber from responsibly managed forests.

Design your own ergonomic chair in 5 easy steps.

Start creating your own ergonomic chair here.

1 Choose your backrest

2 Choose your seat

3 Choose your base

4 Choose your armrests (optional)

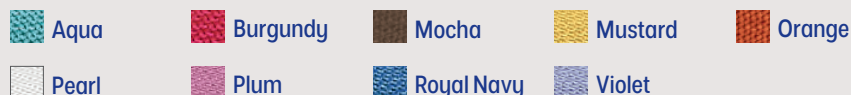

5 Pick up or order your items

Colours available:

Colours available to order:

Visit our website to find out more and shop the entire range.

This could be your most comfortable business decision ever.

Ergonomic chairs are designed to improve your posture and relieve back pain so you can work more productively for longer.

“Officeworks provided just what we were looking for. We could relax while overseas knowing the project was taken care of.”

Phillip Wen – Managing Director, PBX Enterprises

What we stand for.

At Officeworks, everything we do is geared towards helping our customers achieve their big ideas. We do this by offering the widest range of high-quality products at low prices.

This commitment extends to our Workspace Solutions service – commercial-grade business furniture that helps you make your business the best it can be.

What we do.

We specialise in sourcing, delivering and installing office fit-outs on time and to budget. Our supplier relationships offer access to a wide range of options, including bespoke furniture to fit within a certain space or to achieve a desired result.

From ergonomic, executive and desk chairs to height-adjustable desks and versatile filing options, we have the right range to help achieve a solution that’s perfect for any workspace.

All our products are backed by warranties of up to 15 years, including a range designed for 24/7 use.

How we do it.

Our Workspace Solutions team are highly skilled project managers, estimators and workplace strategists that offer a complete range of services, including:

- Office fit-outs
- Storage and filing
- Space planning

- Activity-based workplace and work-from-home strategy
- Ergonomic solutions
- Professional installation teams

Professional service from beginning to end.

Our end-to-end Workspace Solutions service offers a broad range of benefits, including:

- Working with customers from the early stages of projects, quantifying current and future furniture requirements
- Recommending ways to work more efficiently, reducing workspace footprints, increasing collaborative areas and preparing corporate work-from-home packages
- Providing comprehensive quotations, accurate ordering, efficient scheduling and regular project updates
- Delivering and installing products to schedule and to budget
- Ongoing after-sales support

To find out more contact our Workspace Solutions Team for a no-obligation consultation or visit [officeworks.com.au/workspacesolutions](https://www.officeworks.com.au/workspacesolutions)
