STEP 1

Cut a lily head shape out of coloured paper, which is like a wide leaf with a point at each end.

STEP 2

Form a cone and glue the edges to seal, leaving a hole wide enough in the bottom to fit the pipe cleaner stem.

STEP 3

Twist together two green pipe cleaners to make a sturdy stem for your lily.

STEP 4

Cut a small piece of yellow pipe cleaner and coil it tightly around the end of your stem, making the stamen.

STEP 5

Push the stem through your lily, so that the stamen peeks out. Repeat all steps to create a bunch, and tie with twine.

With its fine paper folding and scissor work, it's the perfect quiet crafternoon project.

STEP 1

Fold paper back and forth, until the sheet is completely pleated. Cut the page into two pieces of folded paper.

STEP 2

Pinch each piece in half and use the glue gun inside the middle to make a fan. Hold together until the glue sets.

STEP 3

Use a pipe cleaner through each fan's fold to secure the semi circles together, then glue the seams to make a rosette.

Cut out the 'face', some 'ribbons' and a trophy and stick them on. The ribbons attach to the back of the rosette.

WHAT YOU WILL NEED

- ☐ Kadink Chenille Stems Tinsel 25 Pack (pipe cleaners)
- ☐ Studymate Soft Grip Scissors 6"/152mm

STEP 1

Take two pieces of sparkly pipe cleaner and twist together to form one big circle as a base for the necklace.

STEP 2

Cut more pipe cleaners into small pieces which will become the starbursts and decorative elements.

STEP 3

Start attaching the decorations by pressing the ends over the circle and squeezing to hold in place.

STEP 4

Add some 'gemstones' by twisting small pieces into balls, leaving a little end free to attach to the circle.

STEP 5

Trim any pieces that look too long and tighten any loose 'decorations'.

STEP 1

Roll a lump of air-dry clay into a ball and let it drop onto a hard surface, to slightly flatten the bottom so it sits.

STEP 2

Push a pencil into the ball to make a hole, careful not to hit the bottom. Add designs to the surface using the tip.

STEP 3

Allow the clay to dry, which, with a thick ball, can take a full day. Then paint to add some flair and fun.
